The purpose of this handbook is to provide the Service Technician with a document which contains the part numbers for P.M. Packs for equipment under STERIS service contract. It also includes, for reference, a list of individual part numbers for the items included in the P.M. Pack(s) as well as the corresponding PMCL (Preventive Maintenance Check List) part number.

For each piece of equipment under contract, the appropriate P.M. Pack(s) must be ordered so that preventive maintenance can be performed.

Note that some equipment does not have P.M. Packs available. In these cases, the individual parts are listed and must be ordered separately.

Tables and lights do not require P.M. Packs, therefore only the PMCL part numbers are listed in this handbook.
